

Bring Your Own Device (BYOD) Program

Minimum Device Specifications and Requirements

Windows Laptops, Apple iMacs and Chromebooks are permitted in line with the following specification requirements.

Devices & Operating Systems

- **Chromebook** - Latest Chrome OS version
- **Windows Laptop** - Windows 10 or Windows 11
- **Apple Laptop** - MacOS 12 or newer

Android, iPhone, iPad, and Linux devices are **not** supported at the school.

Internet Browser

- **Google Chrome**

This is automatically installed on Chromebooks but it is requested if your child has a Windows or Apple laptop that you install Google Chrome onto the device before bringing it in to be connected to the network.

RAM and Storage

- **Chromebook** - 32GB Storage and 4GB RAM
- **Windows & Apple Laptop** - 128GB Solid State Storage and 8GB RAM

Screen Size

- Minimum: 11"

Battery Life

- A **minimum of 8 hours battery life** is required so that the device lasts the whole school day.

Wireless Connectivity

Devices must support the following:

- **5GHz 802.11n or 802.11ac or 802.11ax standard**
- **WPA2 Enterprise security**

Devices with only 2.4ghz support will not be compatible with the school's WiFi network and not allow connectivity. Please ask the vendor if the device is 5ghz compatible or contact the school for advice.

Keyboard

- The device **MUST have a physical keyboard.**

Additional Considerations

- A case/cover to protect the device from drops
- A lightweight device to make it easier to carry
- Insurance in the event the device is broken or lost
- Extended warranty to reduce future possible repair costs
- Computer life expectancy is 4 years (not including physical damage/wear and tear). Meaning that students entering Year 7 may require a new device entering senior years.
